BIOGRAPHICAL SKETCH

Werner Reinartz is a Professor of Marketing at the University of Cologne, Germany. Furthermore, he is the director of Center for Research in Retailing (IFH), one of the largest applied research centers in the Faculty of Management and Economics. Furthermore, he is the speaker of the research initiative “Digital Transformation and Value Creation” at the University of Cologne and the speaker of the Business Administration Faculty. Previously, he was the Cora Chaired Professor of Retailing and Management and Associate Professor of Marketing at INSEAD, France. Professor Reinartz holds a Ph.D. in Marketing from the University of Houston (1999).

His research interest and expertise focuses on the subjects of marketing strategy, retailing, customer management, advertising effectiveness, and channel management. In particular, he is interested in the questions of how firms can compete successfully in mature markets, marketing mix efficiency and effectiveness, and the successful management of lasting, profitable customer relationships. His research approach is empirical and quantitative, often involving large databases and advanced statistical analyses. In terms of research productivity, he has been ranked among the top 2.5% of scholars in the world (58 out of 2257; Journal of Marketing 2009) in terms of time-adjusted publication rate in the top four journals in the marketing discipline. Moreover, he has been ranked in all of business administration in German speaking countries in the top 2.6% of all researchers (79 out of 3016; Handelsblatt 2012). In a more recent survey (Elbeck and Vander Schee 2014), he has been ranked as the # 1 scholar outside the US in citations in the top marketing journals from 2003-2012. His total citation count is 12022 (Google Scholar, September 2017) and his research citation g-index is 107 (Harzing.com). Since 1999, he generated a total amount of research grants and awards of €1.2m.

His research work has been recognized with major academic awards, such as the 1999 AMA Doctoral Dissertation Competition, the 2001 Don Lehmann Award for the Best Dissertation-Based Research Paper to be published in Journal of Marketing Research or Journal of Marketing, the 2003 and 2005 MSI/Paul Root Award of the Journal of Marketing, Finalist for the 2009 O’Dell Award, and the 2011 Sheth Foundation/Journal of Marketing Award for long-term contribution to the marketing discipline. He has published extensively in the top journals of the field such as *Journal of Marketing*, *Journal of Marketing Research*, *Journal of Consumer Research*, *Journal of Retailing*, *International Journal of Research in Marketing*, and *Journal of Service Research*. In addition, his research was presented in five different feature articles in *Harvard Business Review*. Furthermore, he is an area editor at the *Journal of Marketing*, *International Journal of Research in Marketing* and the newly founded *Journal of Marketing Behavior* as well as a member of the editorial boards of *Marketing Science* and the *Journal of Retailing*. In June 2010, he was the host of the Marketing Science Conference, one of the premier conferences for academic research in the marketing discipline globally.

Professor Reinartz has worked with a large number of international companies such as for example IBM (Germany), Allianz (Germany), the Cora Group (France), GfK (Germany), ABN AMRO (Netherlands), Spiegel (USA), METRO (Germany), Henkel (Germany), AKBANK (Turkey), Comdirect Bank (Germany), CGG (France), The Nielsen Company (Germany) and ThyssenKrupp (Germany). In addition, he has conducted extensively executive training programs for many Fortune500 and EuroStoxx50 companies.

CURRENT POSITION

- Professor of Marketing, University of Cologne (2007 – ongoing)
- Director, Center for Research in Retailing (IFH) (2007-ongoing)

OWN DISSERTATION

Customer Lifetime Value Analysis: An Integrated Empirical Framework for Measurement and Explanation

The dissertation focused on methodological and managerial aspects of customers' lifetime dynamics. The explicit research objectives were to empirically measure lifetime for a non-contractual relationship, to show the factors that impact on the length of a customer's lifetime, and to empirically investigate the association of customer lifetime duration and customer profitability.

The contribution of this research lies on two fronts. First, it suggests and implements a methodological procedure for measuring lifetime value. Second, given that lifetime value is measured reliably, it derives managerial insight into the antecedents and consequences of customer lifetime value. Thus, it contributes to a better understanding of the customer management process.

Dissertation advisor: Prof. V. Kumar (Richard and Susan Lenny Distinguished Chair Professor in Marketing, Georgia State University)

Company-Specific Program: ORACLE (Asia)

- Oracle CRM Program, 2006

Teaching Material Development**Case studies**

Independence.com (2000) (Insead case study 08-2000-4908)

Independence is a financial services intermediary, providing independent information on all financial products (banking, insurance and investment products) from all suppliers and a tool to purchase these products on-line. The case focuses on the positioning of the company as a partner of consumers in their shopping for financial services, while still being a profit-oriented company. The challenges for Independence will be to build the consumer perception of independence and unbiasedness and to create loyalty in a price-comparison business model. The purpose of the case is to give students the opportunity to identify the various facets of the "Independence Model" and to understand how it can manage customer relationships and loyalty in an information-intensive and privacy-sensitive environment.

Also available: Teaching Note

The case has been reprinted in:

-Jaworski, Bernie, and Jeffrey Rayport (2001): E-commerce Cases. McGraw Hill

Customer Relationship Management at Capital One UK (2003) (Insead case study 2003-5016)

Capital One, a credit card company, has built its business on a strategy with a clear customer focus: The company systematically gathers and analyzes information on its customers in order to correctly assess their individual credit risk and to offer products and services tailored to their needs. In doing so, the company was the first to reject the industry practice prevailing until then, to offer identical credit terms to all customers. The Capital One case is designed to illustrate how the concept of customer relationship management (CRM) can be translated into the strategy, organization, processes and infrastructure support of a company.

The case is also available in a CONDENSED version.
Also available: Teaching Note

From Category Management to Customer Relationship Management. The Case of Henkel (2006)

Manufacturers of fast moving consumer goods are struggling to identify how CRM practices should be applied to their industry. What makes their situation different from other firms and more difficult to manage is the fact that this industry is characterized by a detachment from the end consumer (retailers are intermediaries) and average per consumer expense in the individual categories is relatively low. However, manufacturers sense that existing category management practices are for the most part exhausted in terms of providing competitive advantage. Therefore, manufacturers like Henkel explore how to make the shift from CM to CRM and more specifically how to make CRM work to their advantage. The goal of the case study is to explore substantive questions such as:

- how a manufacturer of FMCG should approach CRM
- how to arrive at a customer segmentation that enables the best targeting strategy
- the role of segment level communication (for example, what is the right level of communication?)
- to investigate the economics of the proposed approach
- to explore whether a partnering strategy with the retailer is critical or not

ISS - Driving Profits through Customer Satisfaction (2006) (Insead Case study 01/2006-5335)

In the domain of customer management, one can observe that in the last years, that managers have shifted, relatively speaking, their attention away from satisfaction and loyalty issues and that they have directed their attention more and more towards customer profitability issues. The objective of this case is to investigate the chain from service quality, customer satisfaction, customer retention, to revenues and profits – the so-called Satisfaction-Profit Chain. In particular, the goal is to outline the critical managerial issues when trying to implement the chain, i.e. measuring and managing the various stages. The situation is illustrated with the example of ISS, a large Danish B-to-B services firm.

The teaching objective is to illustrate the mechanics of the Satisfaction-Profit chain. More specifically, how the individual components of the chain are measured, how these components are linked in practice and how the entire chain can be managed.

Media-Saturn: You Never Change a Winning Go-to-Market Strategy—Do You? (2011) ECCH case study, 511-032-1

Media-Saturn Holding (MSH), the largest and most successful store-based retailer of consumer electronics in Western Europe, has recounted a nearly impeccable success story since its founding in 1979. By the time it was operating 818 stores in 2009, its tremendous success derived from three key factors: its large assortment, its extremely well-known brand, and its strong pricing tactics (i.e. the creation of a very favorable price image and local differentiation of prices). However, its very ability to exploit regional price differentiation became the story spoiler in a transparent, competitive online environment. Thus the company has never actively pushed a multichannel business model, even as new online protagonists such as Amazon achieved meteoric success in the German consumer electronics market, with no slowing or tipping point anywhere in sight. The challenge thus becomes how to expand a traditional store-based retail model into a competitive multichannel model.

The objective of this case is to provide a platform for discussing the implications of Internet and multichannel retailing for traditional retailers – in particular for those that depend on local execution through third parties such as intermediaries, associates, franchisees, or agents. The case is targeted to a master's-level or executive audience that has an interest in marketing strategy, distribution channel strategy, retailing, and Internet topics.

Distance Learning Modules

Customer Relationship Management: What CRM is and where CRM can be used?

(2002) The objective of the online course is to enable managers to acquire a fundamental understanding of both the theory and the application of successful CRM, to evaluate how appropriate a CRM strategy is for their organization, to recognize how to meet the needs of different customer types, and to launch, assess or advise on CRM initiatives.

The course is distributed by *Insead Online (IOL)*.

Online Learning Tool

Customer Value Calculator (2002) by Mihai Calciu and Werner Reinartz

<http://claree.univ-lille1.fr/%7Ecalciu/customerequity/>

The purpose of this online tool is to enable easy and fast calculation of the monetary value of a customer base to the firm. Based on the instructor's/manager's input, it allows

- to calculate the value of a firm's customer base,
- to simulate the customer value consequences of varying input parameters (what-if analysis),
